

**Product Guide****A 4472 8 Zone Paging Microphone**

# A 4472 8 Zone Paging Microphone

**Overview**

The A 4472 has been designed specifically for use with the A 4470/80 multi-zone switcher as part of a modern integrated PA/paging system. It enables paging to any zone or combination of zones.

It also has the ability to inhibit paging to a selected zone and in an emergency page all zones.

Zones can be labelled via a USB keyboard and they can also be grouped and stored for instant 'one touch' recall.

Multiple units can be 'daisy-chained' up to 300 metres from the main amplifier so the system can be accessed easily.

**Large Clear LCD Screen**

There is a large backlit LCD screen to provide vital, up to date zone group and paging information on the operation of the system. It will also inform you if another console is accessing the system.

**Simple Installation And Connection**

The A 4472 is designed to have a small footprint on a desktop yet still being flexible in its operation. Connection to the A 4470/80 is via standard Cat5e UTP network cable which can be up to 300m in length which makes for simple economical through-wall cabling.

**Specifications****Electrical**

Output connection:	2 x RJ45 8P8C
Data transmission:	Cat5e cabling max 300m
Other inputs:	USB keyboard (type A)
Mic frequency response:	100Hz - 10kHz
Mic sensitivity:	-76dB $\pm$ 3dB
Mic polar pattern:	Cardioid (unidirectional)
Power connection (24V dc)	2.1mm dc socket

**Controls**

Front panel controls:	Zone selection (1-8), store recall all call, cancel, emergency paging, PTT switch
Rear panel controls:	Chime output level, mic output level

**Mechanical**

Weight:	$\approx$ 600g
Mic gooseneck:	$\approx$ 325mm
Dimensions (overall):	235W x 110D x 55H mm (excluding gooseneck)
