

Cel-Fi™ by Nextivity - 4G Boosters

The Cel-Fi product line is the best solution on the market for addressing the universal challenge of poor cellular coverage on the road. Unconditionally network safe, with an exceptional coverage footprint and carrier approved for 3G/4G/LTE voice and data. The Cel-Fi range can be fitted to trucks, 4WDs, caravans and normal road going vehicles. Plus a fixed installation system is also available for boosting coverage inside buildings and facilities.

Cel-Fi G41 4G/5G Booster Package For Fixed (Building) Installations

The latest in 4G cellular repeater technology for fixed installations in homes and businesses. The G41 has a higher output power (+20 dBm), providing the largest coverage area of any Cel-Fi booster. It can be easily switched between Telstra, Optus and Vodafone-TPG should you change service providers. An RJ45 ethernet interface allows simple remote management of the repeater when connected to your network. It's the perfect product for those wanting to run their home internet over 4G.

Features • Designed for fixed building applications • Improves 3G and 4G coverage (5G future compatible) • High output power (+20dBm) • Includes internal and external antennas • Switching design allows use on Telstra, Optus or Vodafone • Carrier approved • 12V DC powered (supply included) • SMA antenna connections • Simple management through WAVE mobile application • Up to 3000 m2 coverage area • Ethernet Port for connection to internet source for live monitoring

Included in Pack:

- 5/7dBi Internal Wall Panel Antenna.
- 12.14dBi External LDPA Antenna
- 10m & 6m lengths LMR240 cable
- Ethernet cable • Mains power supply
