      BLUE button:Select subtitle type.
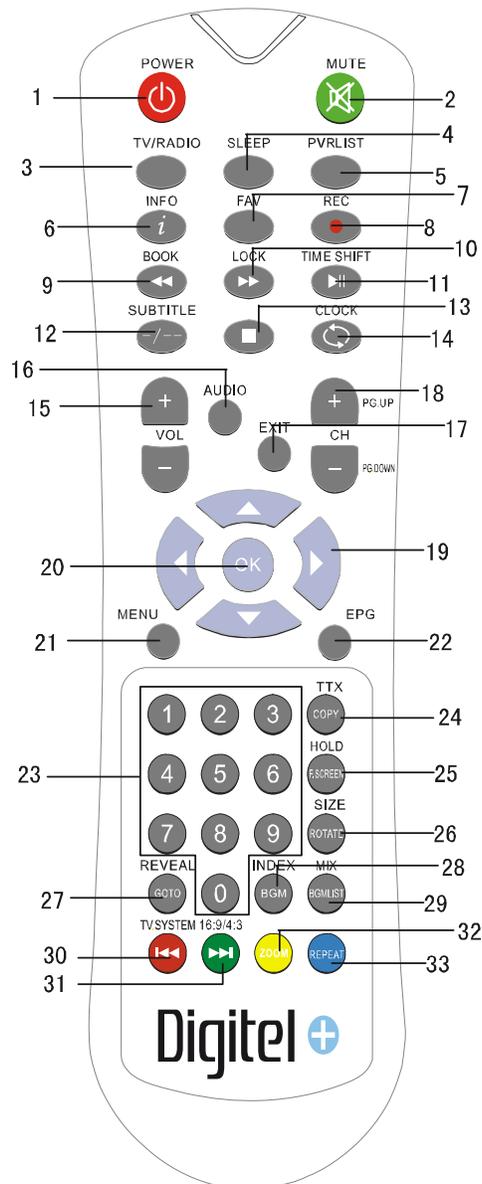

2.3 Quick Setup

(Step 1) – Select Your Television & Connection Type

| Display Type	Image	Connection Type	Required For
Standard Definition TV		Composite Video & Audio Connection	All CRT TV's, Some Non HD Ready Rear Projection TV's, Some Non HD Ready LCD and Plasma TV's
Standard Definition Plasma or LCD TV		Component Video Connection	Most LCD and Plasma TV's, Rear Projection TV's & Digital Projectors. **Note:** Red & white audio leads are also needed when using the component video connection.
High Definition Plasma, LCD & LED TV		HDMI Connection	Recommended for all HD TV's with HDMI input available.

Analog A/V Cable Identification.

Composite Video & Audio: Yellow Video with Red & White Audio Leads.
Component Video: Red, Green & Blue Leads (used with red & white audio leads).

(Step 2) – Get Connected

After you have chosen your television type and selected the appropriate cables to connect your set top box. Follow the diagram below to get connected.
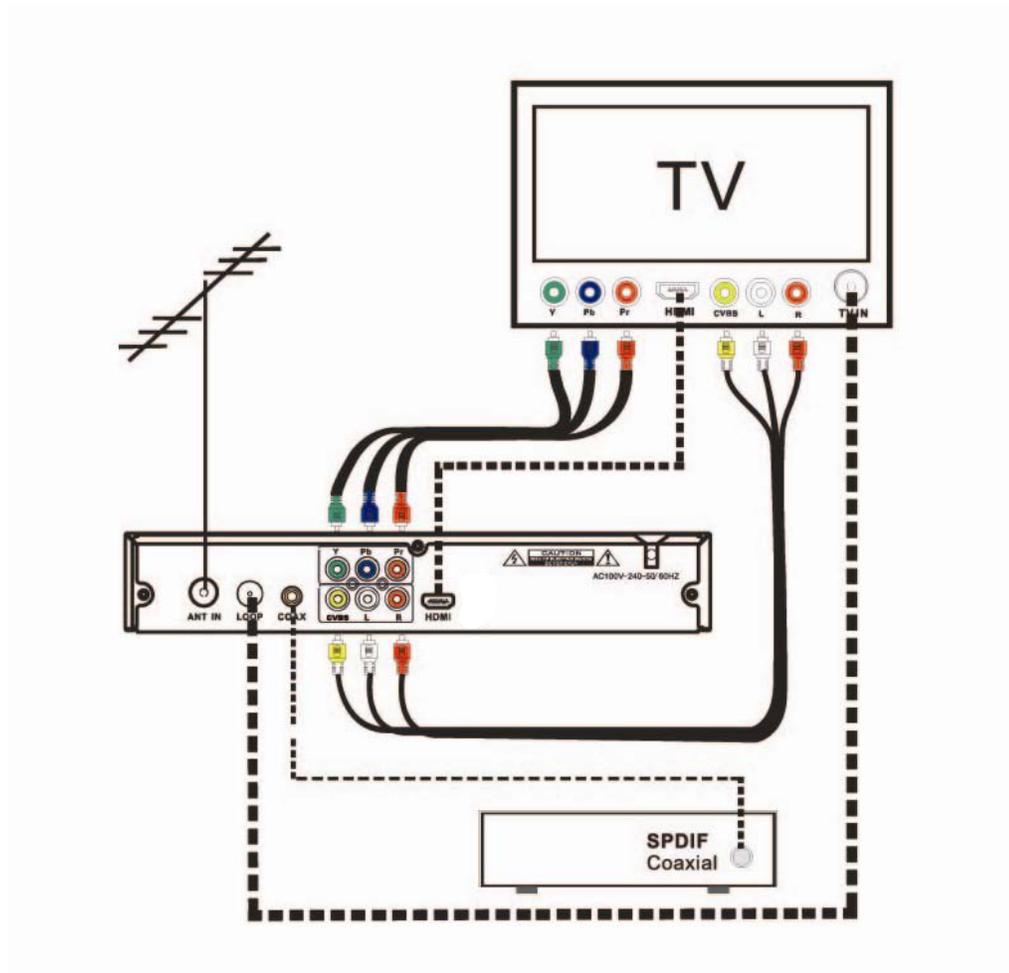

> For the safety of you and your new set top box please have the power point switched off before connecting your set top box to power

Please Note: You do not need to connect all of the different cable types as displayed above, this is purely for illustration purposes. When connecting your set top box you simply need to follow the steps above and use the one cable type that best suits your TV.

(Step 3) – Get a Display/Picture

After you have connected your set top box to your TV you will need to get a display on the screen to scan for channels and start enjoying digital television.

(1) Switch on your power supply (wall, power board etc.).

(2) Turn on your set top box at the button on the front of the unit.

(3) Turn on your television.

(4) Set your TV to the correct input setting by using the "TV/AV" or "SOURCE" buttons on your TV remote control. You may need to check your TV user manual or consult the TV manufacturer's technical support for how to do this.

(5) With the set top box switched on, the television switched on and set to the correct input you should see the following screen

(Step 4) – Scan for Channels

With the installation menu on the screen you are ready to scan your channels and step into the world of digital television.

(1) Use the ◄ and ► arrow keys on your remote to select your preferred language and press ▼ to move to the next option

(2) "Australia" will appear by default as Country, although you can change this option with the ◄ and ► arrow keys and press ▼ to move to the next option

(3) Press "**OK**" on Channel Search to begin scanning for digital channels, once complete your set top box will display a digital channel and you are ready to begin viewing!

Note: Depending on your location your Digitel+ unit may scan duplicate (weaker) channel services. These services can be deleted via the "Program Edit" menu. Please refer to the manual for further information on the "Program Edit" menu.

3. DTV Menu Guide

3.1 Installation Guide

The "Installation **Guide** " menu would appear when it is a new machine or there are no any programs. Use **LEFT** and **RIGHT** buttons to select the language of your preference Country, and your country of residence. Then select "Channel Search" and press **OK** button to confirm auto search.

TROUBLESHOOTING

There may be various reasons for the abnormal operation of the receiver. Check the receiver according to the procedures shown below. If the receiver does not work properly after checking it, please contact the dealer or the local Service Hotline. Do not open the receiver cover. It may cause a dangerous situation and the warranty will get void.

Problem	Possible cause	What to do
The receiver does not turn on	# Mains lead unplugged or no power. # Remote control issue.	# Check mains lead is connected and power point has power. # See 'No response to remote control'.
No signal found	# Aerial cable is disconnected. # Aerial cabling is faulty. # Aerial is damaged. # Out of digital signal area. # Power to signal booster or amplifier is not on.	# Check aerial cable. # Check aerial cable connections, joins, splitters and boosters. # Replace aerial. # Check with TV station or dealer. # Check power supply to booster or amplifier (if # one is being used).
Some channels not found	# Poor signal level or quality for affected channel. # Channel is not broadcast in digital.	# See 'Poor picture or sound quality. # Check with TV station or dealer.
No picture or sound on TV	# TV is not turned on. # Correct input is not selected on your TV. # Bad or incorrect cable connection. # Power to signal booster or amplifier is not on.	# Check TV power switch, mains lead and power point. # Switch TV to correct AV input. # Firmly plug in the correct cables between receiver and TV. # Check power supply to booster or amplifier (if one is being used).

TROUBLESOOTHING (Cont.)

Poor picture or sound quality	# Aerial cable is disconnected or loose.	# Check aerial cable.
	# Aerial cabling is faulty.	# Check all aerial cable connections, joins, splitters and boosters.
	# Aerial cable quality is poor.	# Replace with a quad-shielded aerial cable.
	# Aerial is damaged or analogue only.	# Replace aerial.
	# Bad or incorrect cable connection.	# Firmly plug in the correct cables between receiver and TV.
	# Too many joins or connections in aerial cabling.	# Replace with one quad-shielded aerial cable.
	# Correct input is not selected on your TV.	# Switch to correct TV input.
No response to remote control	# Receiver is not turned on.	# Connect mains power lead and turn on receiver.
	# Remote control is not being aimed correctly.	# Aim remote control at receiver's IR sensor (front panel).
	# Receiver's IR sensor is obstructed.	# Check for obstructions between remote control and receiver.
	# Remote control batteries exhausted.	# Replace remote control batteries
Recording fails	# A USB storage device is not connected.	# Make sure a suitable USB storage device is connected.
	# There is no free space on the storage device.	# Delete some data from the storage device and try again.
	# The USB storage device format is not supported.	# Ensure USB storage device is formatted in FAT or FAT32 file system.

WARRANTY INFORMATION

Please note that Digital Trading Co act as the warranty and service agents for this Digitel+ product. Do not return this card to Digital Trading Co.

WARRANTY CONDITIONS

1. Where required by DIGITEL+ / DTC only the original invoice/receipt issued by the dealer will be accepted as proof of purchase.

2. DIGITEL+ / DTC may reject warranty claims on equipment which it believes to be Illegally acquired or when the "owner" is unable to provide proof of purchase or where Security labels or serial numbers have been tampered with or removed.

3. The warranty covers only defects in the material and workmanship of the product for a period of 12months from the date of original purchase.

4. This warranty is on "Return to Base" basis. The owner is responsible for the delivery of the equipment to the point of purchase and for collecting the repaired or replaced equipment from the same location.

5. The warranty is void if failures arise as a result of any of the following. i) Abuse, misuse, physical impact, normal wear and tear. ii) Alteration or repairs carried out without written authorization from DIGITEL+ / DTC. iii) Upgrade that are not registered by DIGITEL+ / DTC. iv) Operating or maintained other than in accordance with the manual supplied.

6. This equipment will not be considered defective as a result to incompatibility with other equipment or accessories other than the ones supplied with the unit at the time of purchase.

7. This unit should be returned in its original carton and protective packaging or alternatively in a packing suitable to prevent damage. DIGITEL+ / DTC will not accept any responsibility for goods damaged whilst the goods are in transit.

8. Repair or replacement under the terms of this warranty does not give the right to extension or a beginning of a new warranty period. Repairs or replacements may be carried out with functionally equivalent reconditioned parts or equivalent part. Parts that have been replaced become the property of DIGITEL+ / DTC.

9. The customer acknowledges that no promise representation or undertaking has been given by DIGITEL+ / DTC or its dealer in relation to equipment other than as contained in this warranty.

10. A service charge will apply if the fault is not covered within the conditions of this warranty or if there is no fault found. The charge will be based on the current market rate.

11. DIGITEL+ / DTC are not liable for any other loss other than the unit itself.

12. Nothing contained in this warranty shall be read or applied so as to affect the right of the consumer in relation to the provisions of the trade practices act or other statutory rights provided by legislation of the state or territory. In the absence of applicable legislation this warranty will be purchases sole and exclusive remedy and neither DIGITEL+ / DTC nor its distributors or agents shall be liable for any incidental or consequential damages for breach of any express or implied warranty of this equipment.
