

- Dual HDMI inputs
- 25m line of sight range
- WHDI technology
- Infra-red repeater
- 5.8GHz interference free transmission
- Low latency <1ms

## A 3600 Dual Input 5.8GHz Wireless HDMI Sender Transmits 2 HDMI sources up to 25m wirelessly

Utilises the latest Wireless Home Digital Interface (WHDI) technology. Two HDMI devices can be connected and transmitted to a HDMI television in another room. Uncompressed full HD (1080p) HDMI signals can be transmitted up to 25m away, however walls/ceiling slabs may reduce range. In-built IR repeater enables control of the source device from the other room ie: change channels, adjust volume etc. Low latency of less than 1ms ensures excellent video performance with no lip syncing issues. Includes transmitter, receiver, remote control, HDMI lead, power supplies and infra-red emitter.

Specifications	
Operating frequency	5.1-5.9GHz
Video formats supported	1080p, 1080i, 720p, 576p, 480p
Audio formats supported	PCM, DTS, Dolby digital
RF Communication system	MIMO
Modulation	OFDM
Max. transmission power	12dBm
Max. range	25m open, 10m obstructed
Transmission delay	Less than 1ms
Antennae	2 x High performance internal
Power supply	5V DC
Dimensions (L x W x H) mm	Tx 85 x 30 x 12 Rx 91 x 58 x 15
