

Product Guide**C 0388** Professional Handheld Unidirectional Dynamic Microphone**C 0388** Professional Handheld Unidirectional Dynamic Microphone**Overview**

This excellent professional dynamic microphone is suitable for the most demanding vocal applications. It allows performers to deliver vocal power and clarity even in the most acoustically adverse venues. Being a unidirectional (cardioid) microphone its pickup pattern reduces noise from the rear and focuses on the desired sound source reducing background noise and feedback. The frequency response is tailored for vocals and the low-frequency roll off reduces handling noise and feedback.
