## Test Method

This specification data was measured in an anechoic chamber with the microphone 4m from the speaker under test, according to the AS ISO7240.24. Specifications at 1m were calculated from the measurements at 4m in accordance with AS ISO7240.24.

**Reference axis:** Axis is on the centre of the grille surface and perpendicular to the grille surface.

**Reference plane:** Plane is on the grille surface and perpendicular to the reference axis.

**Horizontal plane:** Plane containing the reference axis and perpendicular to the reference plane.
