X 4204

The Inspect-A-Gadget Junior has been upgraded to LED. Now featuring 48 high brightness LEDs with 4500K colour temperature for a natural light output. Two models are available, both with 95mm magnifiers. A 3 dioptre with 12 dioptre insert or 5 dioptre model for fine work. An essential addition to the workshop or study! Not only is it extremely useful for reading tiny component markings or looking for dry joints or broken PCB tracks, but it's perfect for stamp or coin collectors, model makers, jewellers and more! The adjustable arm and balljoint can be set to virtually any position and the magnifying head is equipped with a cover to prevent lens damage or dust build up.

Price Each	RRP	2+	6+
X 4204 3 dioptre plus 12 dioptre insert	64.95	61.50	58.00
X 4205 5 dioptre	69.95	63.95	60.00

Inspect-A-Gadget® LED Desk Mount Illuminated Magnifier

Great for PCB inspection

Read fine print with ease!

New LED high brightness models provide a clear view with low power consumption, less heat & longer life. Possibly the most useful device you could have in your workshop! Reduce eye strain when working on complex PCBs etc. Utilising 56 high brightness, natural white LEDs (colour temperature 4500k). Enables the lamp to maintain the colours of various objects as if illuminated by a natural light source. Uses are only limited to electronics. They are also suitable for stamp and coin collectors, model makers, embroiderers, jewellers and the like. The 130mmØ magnifying head is easily set to virtually any desired position on its spring-loaded arm assembly. Simply clamps to your workbench or desk (up to 60mm thick).

Price Each	RRP	2+	4+

60W Digital Display Ultrasonic Cleaner

new
for 2019

This heated ultrasonic cleaner utilises a powerful industrial 60W transducer to blast dirt, grease and grime from even the tiniest of objects. The 2.5 litre tank is large enough to accommodate objects such as spectacles, hand tools, car parts, dentures, combs, toothbrushes, printer heads, precious stones and metals. An inbuilt 1000W ceramic heater helps to shift more grime from surfaces. Ideally suited for professional frequent use environments such as optical outlets, jewellers etc. Not designed for continuous operation. Tank size: 24.5 x 15 x 7.6cm. See page 187 for ultrasonic cleaning fluid.

60W Digital Display Ultrasonic Cleaner

new
for 2019

This ultrasonic cleaner gently cleans switches, relays, jewellery, glasses, watches, fuel injectors and other very fine parts. Includes tank basket and attachments for watches and other small items. This personal ultrasonic cleaner won't scratch precious jewellery or glass. Simply fill with water (a little household detergent helps), immerse the objects to be cleaned and press the start button. The unit features a 18 x 8.7 x 5.8cm stainless steel tank with a capacity of 800ml. Features a 2 colour led display that has a digital timer with 5 settings suitable for various applications. Not designed for continuous operation. See page 187 for ultrasonic cleaning fluid.
