

Creativity® CR-10 S5 Desktop 3D Printer

The CR-10 S5 is a large volume 3D printer offering the ability to print up to 500 x 500 x 500mm in size. Create more impressive models, print larger pieces and upsize your designs. A 3D printer adds the ability to produce working prototypes, 'one-offs' and finished designs downloadable from the internet. Create your own cosplay parts, fixes for broken things around the house - it adds incredible versatility to your workbench. The design features a Y axis double screw for more stable platform lifting and higher print accuracy - especially on the big jobs! The ultra silent motherboard means the 3D printer runs more stable, noise is reduced and has compression resistance, whilst linear pulley system provides smooth operation with less noise from printer movements. Creativity have built in handy features such as filament sensor to ensure you don't lose your print when the roll runs out and a resume print function to protect from power outages.

This printer also features Creativity's latest extruder mechanism design reducing the risk of plugging and poor spillage from the nozzle and can print using most consumables available on the market today.

Features • Large 500 x 500 x 500mm build area • Double screw Y axis design for added stability • Resume print function • Filament breakage sensor • Low noise linear pulley system • Latest Creativity extruder design • Simple to assemble before first use • In-built power supply • Filament types: PLA/ABS/TPU/Wood/Carbon fibre/Copper

Creativity® LD-002R Desktop Resin 3D Printer

CREATIVITY

Resin based 3D printers are rapidly becoming the go to tool for high resolution 3D prints. They offer a faster print process with excellent accuracy and a stronger finished product thanks to UV curing on each layer. The LD-002R can print objects up to 120 x 65 x 165mm. It is capable of printing up 20-30mm per hour, making it much faster than traditional FDM 3D filament printers. The printer utilises an Ultra HD 2K LCD screen with UV light to cure photopolymers in the resin layer by layer. This results in a prints which can replicate even the tiniest of details down to just 0.02-0.05mm accuracy! Supplied fully assembled with easy to clean resin vat and UV acrylic cover. Size: 221L x 221W x 402Hmm.

Features • Easy to level • Build volume 120 x 65 x 165mm • Stable Z axis design • All metal chassis • 3.5" touchscreen user interface • Easy clean resin vat design • Ultra HD UV LCD screen • 4K/8X anti-aliasing for a smooth finish on prints • 0.02-0.05mm accuracy
