Flexible LED Camping Strip Light Kit

This handy strip lighting kit is great for setting up temporary lighting in tents, awnings, gazebos etc. Simply secure it to your tent poles with the included hook and loop ties and plug it into a 12V power source via the car accessory plug. It's perfect for shedding a little light whilst cooking or use the dimmer to use it as a reading light. The strip is covered in a flexible sheath, and all connections are water resistant for protection from the elements. Yellow LED light helps to keep insects away.

Pack contains • 5m yellow LED IP65 strip light (reduces insect attraction) • LED dimmer module • 12V car power adaptor • 10 hook and loop ties • Carry pouch
