▼ TV Antennas

Digitek® DAB+ Radio Antenna

A high performance antenna designed specifically for DAB+ digital radio reception in digital reception areas. Fitted with F-type balun, UV stabilised plastic parts and heavy duty bifurcated rivets for long life. VHF band III channels 6-12. Length: 670mm.

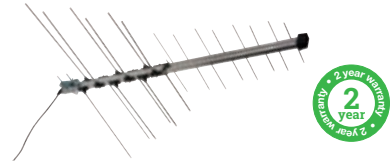

Price Each	RRP	2+	4+
L 2004 Dipole	59.95	56.90	54.00

Which way do I point my antenna?

Visit myswitch.digitalready.gov.au and enter your address. A line on the map will appear displaying the direction of the best transmitter for your location. Zoom right in and you will get a pretty good indication of which way to point your new antenna. If you live close enough to see your neighbours antenna, thats often a good starting point! If you have trouble picking up good reception, try a signal finder such as L 2105A - it can really save you a lot of time going up and down a ladder!

Metro Area Digital TV Antenna

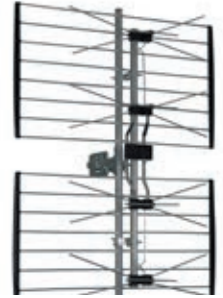

28 element digital antenna for metropolitan area reception. Suits VHF channels 6-12 & UHF 28-35 channels. Periodic log type. Includes 75Ω F-type balun. Can be mounted vertical or horizontal as required. Heavy duty construction on all components. UV stabilised plastics. Length: 1100mm.

Price Each	RRP	2+	4+
L 2006B Metro 28 element	49.00	46.00	42.00

Phased Array Digital TV Antenna

This UHF Phased array antenna has been specifically designed to operate best in areas where reflections and ghosting are a problem. Due to its design it can be mounted horizontally or vertically. The included F-type connection balun and stainless steel mounting hardware make installation simple. While the heavy duty construction ensures years of trouble free service. UHF band IV and V channels 21-69. Includes F-type balun. Size: 600 x 380mm.
