

▼ Mains Power Accessories

Manual Mains Timer Switch

Standard 24 hour mains timer. Allows easy selection of ON and OFF times at any 15 minute interval in a 24 hour period. Power down office appliances when you don't need them, for instance the coffee machine or photocopier after 5pm. 10A, 2400W max load.

Price Each	RRP	2+	4+
X 8010A	9.95	9.50	8.95

Mains Timer Switch

This 7 Day Digital Timer can switch on and off up to 10 times per day. Has a "random" function which turns appliances on and off at non-specified times between 6pm and 6am (great for when you are on holiday). Also features a countdown timer which may be used to turn appliances on or off. 10A, 2400W max.

Price Each	RRP	2+	4+
X 8018A 7 Day Digital Timer	21.95	19.75	17.75

Remote Control Mains Switch

Cut standby power usage around the home and office by switching appliances off at the wall via remote control. Easy inline connection between the GPO and your appliance. RF signal means it works even when the receiver is tucked away behind a cabinet. Max 30m range. Remote has individual on/off buttons for each socket, plus 'all' on/off buttons. Requires 2xAAA batteries for remote. 10A 2400W max per outlet.

Price Each	RRP	2+	4+
A 0346	19.95	17.95	15.95
A 0347 Extra Receiver	16.50	14.95	13.25

RCD Safety Switch Outlet

A handy in-line connection residual current detection (RCD) switch which measures for electrical leakage. This device cuts power to the connected appliance if a fault is detected, protecting the operator from lethal mains voltages. Ideal for use with 240V inverters and circuits not protected by household RCD switches.
