USB Ni-MH/Ni-Cad Battery Charger

Charges up to four AA/AAA Ni-MH or Ni-Cad cells at once for keeping your devices powered up. Indicators display charging mode at a glance. Automatically stops once cells are fully charged to prevent cell damage.

new
for 2019

Features • Charges 4 AA or AAA cells at once • Charging / fully charged indication • Powered by any USB charger at home or in the car • Compatible with NiMH or NiCad cells • Over-charge protection • Short-circuit protection • Reverse polarity protection

Price Each	RRP	2+	4+
A 0290	19.95	17.95	15.95
M 8862 USB mains charger	16.95		

NiMH AAA/AA/9V Battery Charger

Accepts up to 10 x AA or AAA and 2 x 9V batteries for overnight charging. Includes discharge function for optimum battery performance. Only suitable for charging same size and make of battery at one time. Great for home or in-car use. **May be used with low discharge NiMH "Combo" batteries.**

Features • Suitable for AA, AAA or 9V batteries • Discharge function • Includes car accessory plug adaptor • LED charge indicators

Price Each	RRP	2+	4+
A 0276	69.95	63.95	58.75

USB Lithium-Ion Battery Charger

This high performance battery charger features USB charging allowing you to reload your batteries anytime, anywhere. The charger features two indicators to show the charging mode. Stops automatically once your batteries are fully charged to prevent cell damage.

new
for 2019

Features • Suitable for 26650, 22650, 18650, 17670, 18490, 17500, 18350, 17335, 16340 (RCR123), 14500, 10440 • Charges 2 cells at once • Charging / fully charged indication • Powered by any USB charger at home or in the car • Suits Li-Ion cells • Over-charge protection • Short-circuit & reverse polarity protection

Price Each	RRP	2+	4+

M 8862 USB mains charger	16.95		

Sealed Lead Acid Battery Chargers

Quality "plugpack style" SLA battery chargers with auto switching between boost and trickle modes. Featuring an LED indicator showing charging status and quick connection to the battery. Ideal for use in security systems, fire alarms & monitoring systems. M 8520A disconnects the battery once charging is complete. M 8528 switches to float mode once charge cycle is complete, this makes it suitable for permanent connection to the battery.

	Charge Voltage	Charge Current	Suitable Batteries
M 8520A	6 or 12V	0.8A	2.8Ah - 8Ah
M 8528	6 or 12V	2.7A	9Ah - 60Ah

Price Each	RRP	2+	4+
M 8520A 6 or 12V @ 0.8A	32.95	29.95	26.50
M 8528 6 or 12V @ 2.7A	95.00	85.50	76.00

12V 10A Automotive Battery Charger

Suitable for all lead acid type batteries, this compact charger will charge 12V cells using a 10 stage charging circuit. It incorporates summer & winter charging modes for use in cold climates. Plus, a smart battery maintenance mode can recover deeply discharged cells. The circuitry automatically diagnoses the battery state and delivers the appropriate charge current to maintain optimum performance. The charger may be permanently connected without overcharging or damaging the battery. Ideal for seldom used vehicles such as boats, vintage cars, motorbikes etc. Size: 245 x 62 x 102mm.

Features • Short circuit and reverse polarity protected • Overheating protection • Suits 12V lead acid & calcium cells • Includes car accessory plug lead, croc clip lead and ring terminal lead • Winter & summer charge modes • Defective cell detection • Boost charge function • Trickle charge function • IP65 rated

Price Each	RRP	2+	4+
M 8536	255.00	229.00	205.00

6/12V 4.5A Automotive Battery Charger

Suitable for all lead acid type batteries, this compact charger will charge 6V and 12V cells using a 7 stage charging circuit. It incorporates summer & winter charging modes for use in cold climates. The circuitry automatically diagnoses the battery state and delivers the appropriate charge current to maintain optimum performance. The charger may be permanently connected without overcharging or damaging the battery. Ideal for seldom used vehicles such as boats, vintage cars, motorbikes etc. Size: 203 x 48 x 67mm.

Features • Short circuit and reverse polarity protected • Overheating protection • Includes car accessory plug lead, croc clip lead and ring terminal lead • Suits 6V and 12V cells • Winter & summer charge modes • Defective cell detection • Trickle charge function • IP65 rated

Price Each	RRP	2+	4+
M 8534	129.95	116.95	105.00

12V 12A Automotive Battery Charger

This heavy duty 12V charger has been designed to provide 7 stage charging to all lead acid type batteries. It includes an auto-reconnect feature which retains charge settings, making it useful for RV & caravan travellers moving from site to site. It has numerous built in protection features ensuring safe use and optimum charging for your batteries. It can also perform cranking ability and alternator performance tests. Vehicles and batteries can be left permanently connected, making it ideal for charging maintenance on boats and classic cars which are not in use every day.

Features • Selectable output current, 2A, 4A, 8A and 12A • Auto reconnect feature • Short circuit and reverse polarity protected • Overheating protection • Suits 12V lead acid, Gel, EFB and AGM batteries • Includes Croc clips • Winter & summer charge modes • Defective cell detection • Boost charge function • Trickle charge function • Battery level test • Battery cranking ability test • Battery CCA test (cold cranking amps) • Battery alternator performance test • Includes dual USB output for charging devices (3A total)

Price Each	RRP	2+	4+
