HDMI 4K Scaler With Audio Extractor

This compact converter upscales a HDMI 1080p HD signal to 4K/2K (3840x2160), ideal for connecting a Blu-Ray player or game console to a new Ultra HD TV. It also offers the added benefit of audio extraction via S/PDIF optical output. This allows you to easily integrate a digital HDMI source into a system requiring a dedicated audio input, such as active speakers, sound bars, amplifier receivers etc. Supports PCM, Dolby Digital and DTS Digital Surround. Includes power supply.

HDMI To VGA & Stereo Audio Converter

This lead adaptor converts a HDMI signal to VGA and splits the audio signal to a 3.5mm stereo jack output. This allows high quality video signals to be transmitted over greater distances, plus integrate a HDMI audio source into a standard stereo amplifier system. Supports HDTV resolutions up to 1080p. HDCP compliant. It also includes a micro USB to USB 'A' lead for powering from your source/amp or USB adaptor (sold separately).

AHD To HDMI Converter

AHD (Analog High Definition) format is used for transmitting HD video over long distances in CCTV applications. This converter can convert an AHD signal to HDMI with an AHD loop out. Ideal for monitoring an AHD or analogue camera on a HDMI equipped screen. Includes an upscaler that will allow you to adjust the output signal resolution. The converter offers a plug-and-play solution - no software or driver installation. Includes power supply.

HDMI Audio Extractor (Multi Analog Output)

Allows you to split the audio stream from a HDMI signal into either S/PDIF optical or four analog stereo 3.5mm jack outputs - ideal for 7.1 multi-channel systems. This allows you to easily integrate a digital HDMI source into a system requiring a dedicated audio input, such as active speakers, amplifier receivers, PA systems etc. A switch allows you to select a single stereo output if multi-channel is not required. Includes plug-pack. Supports 4K/2K & 3D passthrough.
