

REDBACK

A 4577
6-Zone Alarm
Wallplate

Operating Instructions

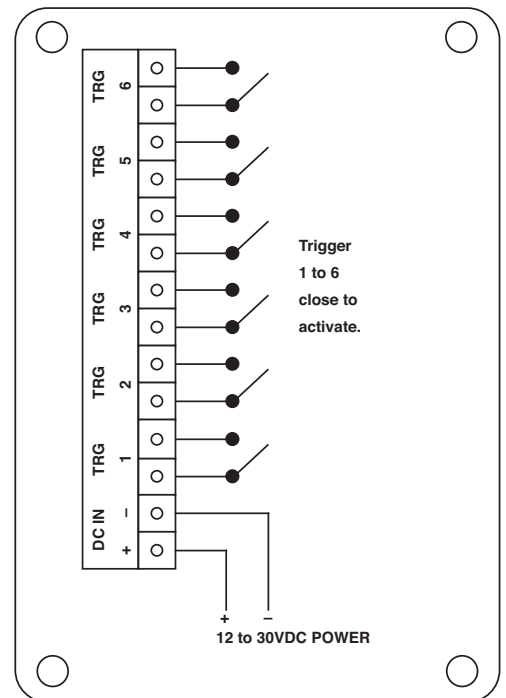

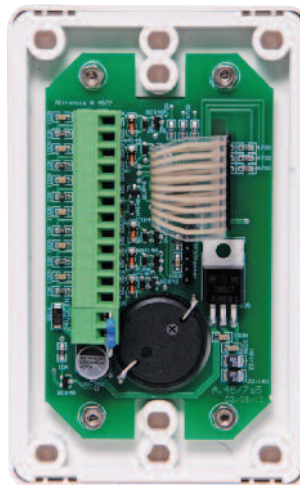

Designed to operate on 12 to 30VDC. This six input wall plate will sound a buzzer and illuminate a specific LED when an input is activated/triggered by a closing contact. A Cancel button allows the buzzer to be switched off whilst the LED indicator remains on until the trigger is removed. The unit will Sound the buzzer anytime a new trigger is activated or a previous trigger is re-activated.

May be used in numerous situations including security, fire alarm and access control systems.

Two snap-on covers are provided, allowing you to choose a style that suits your installation.

Rear Connections
